

BONDFIRE

PROTECTION

FIRE EXTINGUISHERS

As an independent company Bond Fire Protection can offer you a wide range of the latest equipment from a number of leading manufacturers. This flexibility ensures that you are equipped with quality installations that are totally suitable for your type of business and required usage. You can also rely on us for fast, efficient service.

All our fire extinguishers are BAFF* (British Approvals for Fire Equipment) approved to BS EN3 and have a 10 year warranty. Finished in high quality polyester stoved paint, they are colour-coded to assist identification and have clear screen printed instructions. You will find them easy to use, with squeeze grip operation and controllable discharge.

You have a choice of extinguishers
Water, Foam, ABC Powder, CO2, Wet Chemical and Specialist Powders.

Foam Extinguishers

Foam (AFFF – aqueous film forming foam) is suitable for Class A and Class B fires (flammable liquids such as petrol, oil, solvents and paints)

Water Extinguishers

These are designed by fighting Class A fires (Carbonaceous materials such as wood, paper and textiles).

Powder Extinguishers

You will find our wide range of multi-purpose ABC powder extinguishers (either cartridge operated or stored pressure models) suitable for a variety of environments and safe for use on fire risks involving live electrical equipment.

If you need to be able to tackle large risk fires, particularly those involving alcohol, ketones and esters, extinguishers filled with Monnex powder are available on request. For specialist operations involving magnesium, lithium or similar flammable metals the L2 powder extinguisher is the only choice.

CO2 Extinguishers

CO2 extinguishers, available in lightweight aluminium, are suitable for fighting Class B fires as well as fires involving electrical equipment.

Wet Chemical Extinguishers

Specifically designed for deep-fat-fires (Class F), the largest single source of accidental workplace fires, this 6 litre extinguisher provides added safety for hotels, fast-food outlets, restaurants and commercial kitchens.
